

ROBIN ROY

Web Developer

Thrissur, Kerala, India | robinroy1225@gmail.com | +91 9778004292 | Portfolio: robin-roy.onrender.com | LinkedIn: linkedin.com/in/robinroy1225

PROFESSIONAL SUMMARY

Web Developer with 2+ years of professional experience building and maintaining production web applications and RESTful APIs using Python and Django, with additional experience in JavaScript, React.js, and relational databases (MSSQL, MySQL). Strong foundation in Object-Oriented Programming, data structures, and software design principles, with hands-on experience debugging, optimizing, and enhancing legacy codebases. Comfortable using AI coding assistants (Claude, ChatGPT, Cursor, Antigravity) to speed up development while critically reviewing generated code for correctness, security, and maintainability. A fast learner with a strong curiosity for new languages and frameworks, ready to train in ColdFusion and grow into a project- and client-ready engineering role.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Django REST Framework, JavaScript, React.js, HTML5, CSS3, Bootstrap

Programming Foundations: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Design Principles

Databases: Microsoft SQL Server (MSSQL), MySQL — schema design, stored procedures, views, triggers, queries

APIs & Integration: RESTful API design and integration, secure authentication, third-party API integration

AI-Assisted Development: Claude, ChatGPT, Cursor, Antigravity — used to accelerate coding, debugging, and code review while validating output for correctness and security

Tools & Practices: Git, Agile/Scrum, code review, debugging & troubleshooting, unit testing, CI/CD basics

Reporting: PDF/Excel report generation (ReportLab, OpenPyXL), role-based access control, audit logging

Currently Learning: Open to structured training in ColdFusion and PHP

PROFESSIONAL EXPERIENCE

Python Backend Developer — Elanadu Milk Private Limited

Sep 2025 – Present

- Develop and maintain enterprise-grade web applications and RESTful APIs using Python and Django for an ERP platform covering inventory, procurement, sales, distribution, stock transfers, attendance, and trip management.
- Build and integrate REST APIs consumed by web and mobile (Flutter) applications, implementing secure authentication and efficient data exchange, following OOP and clean-code principles.
- Design and optimize Microsoft SQL Server (MSSQL) databases, including stored procedures, views, triggers, and complex queries.
- Develop responsive frontend interfaces using HTML, CSS, JavaScript, React, and Django templates.
- Debug, troubleshoot, and optimize production systems — including legacy modules — to improve performance and reliability; manage releases via Git.
- Use AI coding assistants to speed up implementation and code review, while validating generated code for correctness, security, and maintainability.
- Generate automated business reports in PDF and Excel using ReportLab and OpenPyXL; implement role-based access control and audit trails.

Jr. Python Django Full Stack Developer — MGUIF

Jun 2024 – Sep 2025

- Developed dynamic, responsive web applications using Django, React.js, and JavaScript across five live production projects (Mainsite, HPC, Incubation Site, ICSG Website, Campuzine).
- Designed and integrated RESTful APIs for seamless client-server communication using Django REST Framework and MySQL.
- Built cross-device compatible interfaces with HTML, CSS, and Bootstrap; implemented secure authentication and data handling.
- Participated in Agile development: sprint planning, code reviews, and daily standups.
- Used Git for version control across collaborative feature branches.

Software Engineer — Santhisoft Technologies

Nov 2023 – May 2024

- Built and integrated modular components for scalable single-page applications using Angular.
- Collaborated on frontend deployment strategies and maintained the codebase using Git.
- Contributed to UI/UX design discussions focused on scalability, modularity, and performance.

Jr. Software Developer — Luminar Technolab

Nov 2020 – Jun 2021

- Gained foundational experience in software development practices and web technologies.

KEY PROJECTS

Elanadu Milk HR & ERP Website — Python, Django, MSSQL, React

Sep 2025 – Present

- Built and maintain a full ERP system managing inventory, sales, distribution, attendance, and reporting via RESTful APIs, following OOP design principles; frontend built with React. Live at est.elanadu.in.

MGUIF Web Platforms — React.js, Django, REST APIs, MySQL

Jun 2024 – Sep 2025

- Delivered five production React.js/Django platforms (Mainsite, HPC, Incubation Site, ICSG Website, Campuzine) with real-time API-driven data operations, secure authentication, and optimized UI performance.

EDUCATION

MCA — Santhigiri College of Computer Science (Mahatma Gandhi University), Thodupuzha, India (2021 – 2023, 69%)

BCA — Manonmaniam Sundaranar University, Tirunelveli, India (2017 – 2020, 74%)

CERTIFICATIONS

- Database Management System — NPTEL
- Python Basics — Coursera
- MEAN Stack Web Development — National Council for Technology and Training
- Python and Data Visualization (7-day bootcamp) — ShapeAI
- Introduction to Python and OpenCV — PRODDEC College of Engineering, Chengannur
- C for Everyone: Programming Fundamentals — Coursera
